

CRAM Tutorial – Mobile Application

This tutorial is designed to show you how to work with CRAM in a mobile setting – on your cell phone. Please follow the directions for easy set up, but make sure you take the time to experiment with creating a set of Flashcards for yourself.

Step 1: Setting up Account

You won't be using a "Username" at the top, but rather click on the G+ icon in the bottom right corner of your screen.

This will take you to your Google account and will link CRAM.

Step 2: Options Available

You'll notice that the screen to the right comes up giving you some options for play.

You can:

- Create a new set of Flashcards by clicking on the + sign in the green circle.
- Look over your already created cards.
- Narrow your search by showing the most recently studied.
- Narrow further by sorting through sets of cards you have favored.

Step 3: Create Flashcards

Here is how you set up your new set of Flashcards.

1. Type in your title for the set.
2. Identify the class/topic for which the set is being created.
3. Enter a short description.
4. Decide whether or not you want to have a public set or something just for you.
5. The language you would like it to – this is great for foreign language quizzing.

NOTE: The gear at the bottom of the screen takes you to an optional screen where you can change, update and adjust your account contents.

Step 4: On to the Cards

Once you've completed the set up information move onto the actual card creation itself by hitting the Next button on the top right of this screen.

Front (Term)

Depository Institution

Back (Definition)

Businesses that provide financial services.

+ Add a hint

Front (Term)

Back (Definition)

Step 5: Information
Edit your cards – using the options provided by the APP. Just tap on the space in the APP. Review the boxes on this page and once you've completed your entries hit the "Save" button on the top right corner.

HINT: YOU don't need to add a hint to your cards.

HINT: Takes you back to the "Set Info" screen – Step 3.

HINT: The APP allows for 3 cards. If you want to add another card simply hit the + sign.

HINTS

Step 6: Viewing your Cards

There are a couple options on viewing your cards. The card set simply displays your card – sharing the term and the definition. The Memorize set shares out the response and you turn for the definition. The CRAM Mode is set to drill you based on a Leitner system using a spaced memorization technique.

The GAMES option is simply that – games.

CARD SET

Depository Institutions

Businesses that provide financial services.

Checking Account

MEMORIZE

Businesses that provide financial services.

CRAM MODE

Depository Institutions

Level 1 2 3 4 Memorized

3 0 0 0 0

GAMES

Depository Institutions

Businesses that provide financial services.

Start Over
Another prompt will make sure whether or not you really want this.

Is not an option without a hint

Shuffle Questions

Read Aloud
It will actually read the words for you.

Removes all Distractions on the screen.

CRAM Mode:
You are on the honor system and check whether or not you correctly responded to the term prompt.

CARD SET:
The options on the Card Set screen are different than the other two options.

You can "Favorite" the set.

You can "Share" your card set with other via message, mail, Twitter, or Facebook.

You can add terms/definitions to your card set. Just follow through the process from Step 5 going forward.

This option lets you edit the cards you've created.

Step 7: Closing & Other Options

By hitting the "quad" bars at the top right of the screen all options for account appear on the screen.

1. You can create a new set.
2. You can revisit the Flashcards you have created.
3. You can sort through the most recent cards you've studied.
4. You can look at your "Favored" sets. Remember the symbol on the Card Set.
5. You can change your account settings.
6. The feedback section shares any comments on your publicly shared sets.
7. You also sign out of the APP here.

Enjoy creating your next set of Flashcards!
